

HUSEYN ASHIROV

Junior Network Engineer | Junior System Administrator | Technical Support

Baku, Azerbaijan | +994 (55) 344-0456 | huseynasirov305@gmail.com | linkedin.com/in/huseyn-asirov

PROFESSIONAL SUMMARY

Junior Network Engineer / System Administrator with hands-on experience supporting enterprise network and server infrastructure, including Cisco switching and access points, and Windows Server (AD, GPO, DNS, DHCP). Solid foundation in TCP/IP, routing and switching (OSPF, EIGRP, BGP, VLAN, STP), NAT/DHCP/DNS, and Linux (Red Hat) system administration, reinforced by CCNA-level lab work and industry certifications (CNSP, RHCSA-track, CRTA, CSEDP).

Security-first troubleshooter with exposure to SIEM monitoring and log analysis (Splunk, Wazuh XDR), firewall policy administration, and security hardening on both Linux and Windows platforms.

Currently completing a B.Sc. in Computer Engineering, combining academic grounding with practical lab and on-the-job experience, and actively expanding skills toward CCNA and RHCSA certification.

TECHNICAL SKILLS

Operating Systems: Windows Server 2016/2019/2022, Windows 7/8/10/11, Red Hat Enterprise Linux (RHEL)

Networking: TCP/IP, Routing & Switching, VLAN, Trunking, Router-on-a-Stick, STP, OSPF, EIGRP, BGP, RIP, NAT, DHCP, DNS, Wireless/SOHO Networks, Network Troubleshooting

System Administration: Active Directory Domain Services (AD DS), Group Policy Objects (GPO), WDS, WSUS, IIS, AD CS, SMB/NTFS & Share Permissions, PowerShell Scripting, LVM & Partitioning, Autofs/Automount, Rsyslog, Logrotate, Bash Scripting, Cron Scheduling

Security Tools: , Firewall Policy Administration, Cisco Switch Security, Splunk, Wazuh XDR, Log Analysis, Security Hardening, VPN Concepts, Red Team Fundamentals (vulnerability analysis, web security testing)

Cloud / Virtualization: Docker (containers, images, Swarm), Podman, Apache, Nginx

Programming / Scripting: Bash, PowerShell

PROFESSIONAL EXPERIENCE

Information Technology Specialist

Rockvell Tech — Baku, Azerbaijan

- Administered and troubleshoot Cisco switches maintaining secure and reliable network operations across the organization with minimal unplanned downtime.
- Configured and maintained Windows Server infrastructure — including AD DS, GPO, DNS, DHCP, and WDS — to support centralized identity management, policy enforcement, and OS deployment.
- Performed proactive system administration and security hardening on Linux and Windows systems, improving overall performance, stability, and security posture.
- Diagnosed and resolved hardware and software issues using structured troubleshooting methodology, reducing downtime and maintaining system integrity for end users.

PROJECTS

CCNA Enterprise Network Project — tinyurl.com/yr3xmn7e

- Designed, configured, and secured a simulated enterprise network in Cisco Packet Tracer, applying VLAN segmentation, inter-VLAN routing (Router-on-a-Stick), and switch port security.
- Implemented and validated OSPF/EIGRP routing scenarios and end-to-end troubleshooting workflows, demonstrating practical readiness for real-world enterprise network support.

CERTIFICATIONS

- Certified Network Security Practitioner (CNSP)
- Red Hat System Administration I (RH124), Ver. 9.3
- Certified Red Team Analyst (CRTA)
- Certified Social Engineering Defense Practitioner (CSEDP)

EDUCATION

B.Sc. Computer Engineering — Azerbaijan Technical University
Network and System Administration — Code Academy, Baku (Completed)

LANGUAGES

Azerbaijani (Native) | English (Professional working proficiency — technical documentation)
